

N8.15

I therefore, reaffirm my recom-  
mendations.

- ① Do away with all unnecessary experiments in African Medical Training and in education in general.
- ② Train doctors, nurses and Health and Sanitary Inspectors for the best qualifications in these various professions and provide special facilities for further special facilities for those who ~~have~~ <sup>want to</sup> follow preventive aspect of medicine as a career with attractive emoluments.

~~Minimizing Urgency of~~  
Reducing Urgent Need for Medical Services  
Among the Africans.

I would like to suggest that ~~if~~ <sup>while</sup> we are busy training medical practitioners and Health propagandists and inspectors much could be done by increasing general education facilities among the Africans. Through a <sup>free</sup> public system for all children <sup>and</sup> ~~and~~ <sup>adequate</sup> wages for the Africans so that they should be able to meet their economic requirements & to buy and ensure their sound health through good food, good and habitable houses, <sup>and healthy government</sup> school system of education would help make people <sup>receptive</sup> accessible and amenable to health propaganda. They would be <sup>able</sup> to use their money wisely and to buy and prepare their food intelligently with due regard to health requirements.

With better economic status the Africans, some of them would also be in a better position to pay for the training of their children in medicine and other essential aspects of education, thus laying a foundation in which Africans will be playing their full share in making South Africa, White and black, healthy and happy.
