### **West Rand Extensions.**

One of the most interesting of the new western enterprises is the West Rand Extensions, Ltd., which owns

②

57. Rooidraai Gold Estates 25-6-33

Mr. H. S. Harger, F.G.S., consulting geologist, has made a report on the properties of the Rooidraai (West Witwatersrand) Gold Estates, Ltd. The company originally had options over the farms Rooidraai 75 and Reismierbult 153. Since the date of Mr. Harger's report it has acquired the eastern portion of Blaauwbank 45 (in extent 1,594 morgen 256 square roods), the northern portion of Dutoitspruit 120 (832 morgen 210 square roods) and the south-western portion of Rooidraai (936 morgen), making now a total area of 8,181 morgen 269 square roods. Mr. Harger says he considers there is no doubt whatever that the Lower Rand beds will be found underlying the dolomite, etc., on the farms Rooidraai and Reismierbult with a good prospect of containing some of the auriferous reefs such as Buffelsdoorn, Red Reef, etc, found accompanying those beds north-east of Klerksdorp. The evidence, he says, also strongly suggests the presence beneath the dolomite and other beds of the Main Reef or Randfontein horizon on Rooidraai, and he thinks the chances sufficiently promising to justify a serious effort being made to locate them by boring. It is officially intimated that shareholders registered on July 10 will be entitled to subscribe for the remaining shares of 2s. 6d. each at 5s. per share.

## WEST RAND EXTENSIONS

Another interesting western enterprise is the West Rand Extensions, Limited, which (as previously pointed out in this column), owns options over a number of farms and portions of farms situated between and next to the properties of the leading companies in that district. The areas held under option, amounting to approximately 14,000 morgen, are all situated either on the dip or on the strike of the assumed extension of the Main Reef Series, and they include portions of such potentially valuable farms as Doornkloof 155 and Leeuwpoot 91, Oog van Wonderfontein 34, Droogespruit 53 and Palmietfontein 29, Syferfontein 21 and Goedgevonden 20. The company holds the mineral and surface rights over 3,700 morgen of the farm on which Bank Station is situated, and when the big expected developments on the adjoining West Wit. Areas are realised the value of this asset should be very considerable. The company is capitalised at £15,000 in shilling shares. 8 May 33

## STILL LOOKING WEST!

Still another company has been registered with a view to anticipated activity on the western extension of the Witwatersrand. This is known as Western Rand Extensions, Ltd., with a capital of £15,000, and is making a bid for popular support by the issue of low-priced shares, which have been quoted on the Stock Exchange at 3/-.

This company holds options on portions of the farms Doornkloof No. 155, Leeuwpoort No. 91, Welverdiend No. 64, Droogespruit No. 53, Palmietfontein No. 29, Goedgefontein No. 20, Cyferfontein No. 21 and Bufflesdoorn No. 58. These holdings total approximately 11,555 morgen and are in close proximity to the properties held by the half dozen big mining houses whose activities have excited so much interest in the district where prospecting and boring operations are in progress.

options over a number of farms and portions of farms situated between and next to the properties of the leading companies in that district. The areas held under option, amounting to approximately 14,000 morgen, are all situated either on the dip or on the strike of the assumed extension of the Main Reef Series, and they include portions of such potentially valuable farms as Doornkloof 155 and Leeuwpoort 91, Oog van Wonderfontein 34, Droogespruit 53 and Palmietfontein 29, Syferfontein 21 and Goedgevonden 20. The company holds the mineral and surface rights over 3,700 morgen of the farm on which Bank Station is situated, and when the big expected developments on the adjoining West Wit. Areas are realised the value of this asset should be very great. The company is capitalised at the modest figure of £15,000 in shilling shares, and this very small capital, combined with the enormous possibilities of the areas over which options are held, makes the enterprise one of the most attractive on the western field. *MJ. 6 May 1933*

## *Another Stake in the New Goldfield.*

A company styled Western Rand Extensions, Ltd., has been registered with a capital of £15,000. This company holds options on portions of the farms Doornkloof No. 155, Leeuwpoot No. 91, Welverdiend No. 64, Droogespruit No. 53, Palmietfontein No. 29, Goedjefontein No. 20, Cyferfontein No. 21, and Buffelsdoorn No. 58. These holdings total about 11,555 morgen and are more or less in the neighbourhood of the farms held by the mining houses interested in this portion of the syncline. In relation to the holdings of West Witwatersrand Areas, Ltd., they do not form a compact block. Welverdiend No. 64 lies to the north of the blocks of claims owned and optioned by West Wits. Leeuwpoot No. 91 and Doornkloof No. 155 lie immediately to the south of these, while Cyferfontein No. 21 is in a direct line far to the west.

The new company's shares are low-priced and are quoted on the stock exchange at about 3s.
