25 March Mr. Hooper - 260 Natal Indian Congress 260 Durban Impression

In the past, the Protectorate of Rhodesia paid for the medical education of their students available at the JHB medical school - £200 p.a.

Negotiations are under way with the C.P.W. Foundation in G.B. as well as with the Rockefeller Foundation in America for financial support for the section of this University. The chief basis of the interest of these organizations in our University has been the fact that it will serve the needs also of Africans in territories outside the Union south of the equator. This has by the fact, which has been given fairly wide publicity, has multiplied one of the main arguments we had for strengthening our case for financial support.

The loss of endowment for research facilities in the proposed medical school at the post-graduate level which it was hoped would provide, in a serious matter to the University.

39 - received Govt. Curasiao - £300 p.a. from Basutoland since 1949

Basutoland - 9 of the 14 students received outright Curasiao of £50

3 - received loan Curasiao

Bachuanaland - Both the students received Curasiao covering fees + books. £500 p.a. from S. Rhodesia since 1949

Swaziland - 1 of the 2 received Curasiao of £15. Swaziland had decided to award 2 £70 Curasiao from 1951.

S. Rhodesia - 13 of the 21 received Govt Curasiao of £65 - to be increased to £80 from 1951. Some of the other were paid for by missionary bodies.

N. Rhodesia - all 5 received fees + books + other approved costs. total of £472 paid to or through the College in 1950.

Nyasaland - All 6 were helped - Curasiao of £120 to cover total cost including mileage, clothing, vacations etc.

Kenya, Tanganyika & Uganda - No Govt Curasiao but other help (see under the 25)

Reverse from fees will be lost: non-medical courses being merged. Many that would have to be closed down completely owing to the smallness of the classes. This will actually mean that Union non-tropical students will be deprived of facilities which the University would otherwise have been able to offer them.

By reducing the no. of students attending a particular course, it is very likely that it will be closed up between 30 & 40 weeks south of the Sahara, relations which seem essential to maintain & cherish if SA wishes to equip a cultural & scientific leadership in this sub-continent.

We would lose the grant in previous column, but would also lose a source of capital contributions which we were in process of investigating. We should in any case have had to ask the other territories to provide capital contributions to make it possible for us to receive places for their students. There is no doubt that outside territories have been getting University education for their students at very low cost to themselves & should be prepared to share more fully in the cost of such education. Now that our accommodation is being used to the limit of its capacity, "buying ourselves in" would be the reasonable way to secure a number of reserved places. I see no other way in which it will be possible for us to keep our doors open, as we would very much like to do.

Discussions are proceeding at government level, & we have suggested that some of these territories be allowed to make suitable capital contributions in return for specified numbers of reserved places.

Our total assets to-day are valued at approx £400,000 so that the capital cost is approx £1000 per student.

Vocational Training Institutions

1. Fort Cox Agricultural College,

S. Rhodesia - £60
N. Rhodesia - fees, books, boarding - £4 per term
Personal allowance
Rail fares.
See schedule.

Supported by Missions concerned.

No income received from outside the Union specifically for non-Union students. A total of about £100 received from outside the Union as general aid.

No adverse effect, as grants from the Rhodesians do not completely cover ~~school~~ costs to the School.

I assume that, since this institution does not receive any form of government money, the decision will not apply here.

Severing of friendly contacts to the territories to make other arrangements. It remains open to question on grounds of equity dealing that we should request 2000 to 3000 mine workers from Rhodesia to refuse education. We feel that this applies with special force to the special training at our school, which aims to improve the social conditions of territories employing our graduates.

Ours is a Co-operative Training College for Pastors. Selected students from the Lutheran missions sent for training.
Rhodesian mission field is still in a primitive stage of pioneer missionary development, & no adequate facilities for the training of our African clergy exist there.
We are presently hoping that theological students will be exempt from the ban. They are sent & supported by the missions in the territories concerned. A petition has already been sent to the Minister of Native Affairs.
We are prepared to give every co-operation in seeing that the necessary safeguards are enforced - of to take precautions against students leaving their studies to enter employment in the Union.

Future students will be able to complete the course in Rhodesia

The move was hasty & discourteous. No time was given to the territories to make other arrangements.
