DENTAL FACTS WITHOUT ANY BALLYHOO

You owe it to your child

Always on the alert against infection, you scrub your child until he yells, but you forget the invisible enzymes that cause three decayed teeth by the age of nine, ten by the age of sixteen. Acid producing enzymes are no respecters of age—children need the same quality toothpaste as adults, plus something more. Something which is to be found in Koly nos toothpastes. Enzymes are destroyed by the anti-enzyme ingredients in Koly nos toothpastes, and children like the taste of Koly nos. Once in the mouth, the special Koly nos foam penetrates and cleanses hidden crevices which are missed by a lazy brush.

DON'T BE FOOLED

Beware of unproven claims. No toothpaste can completely eliminate decay, but the best can reduce the danger to an absolute minimum. Because Koly nos toothpastes are backed by fifty years' research, contain only dentist approved ingredients and possess unique foaming properties—they do what they claim. Millions of mothers swear by Koly nos, they find Koly nos more than a name—it's a guarantee.
