Dear Sir/Madam,

We are sending you the pamphlet 'Face The Future' in the hope that you will find it of interest.

The pamphlet traces the growth of African Nationalism as a force throughout the continent and comments on the failure of the European to come to terms with it. It urges that White South Africans face the realities of our position squarely and meet the challenge of Africa; if we are not to be swept away in its turbulent passage.

The statesmanlike role played by the African National Congress before it was banned is assessed, but the pamphlet warns of the danger of extreme White action evoking its Black counterpart. It urges that the situation must not be left in the hands of the Nationalist Government, for that is the road to disaster.

A foreword by Chief A.J. Lutuli introduces the pamphlet, and there is an appendix giving the Freedom Charter in full.

If you wish to keep this copy, the cost is 1/-. If you do not, please return it to the above address.
