

Alexandra Health Centre and University Clinic.

ANNUAL REPORT

For the Year 1952.

ALEXANDRA HEALTH CENTRE AND UNIVERSITY CLINIC.

THE Chairman and Members of the Board of Management
cordially invite you to be present at the

ANNUAL GENERAL MEETING

to be held at the Clinic, Second Avenue, Alexandra Township,
on SATURDAY, 25th APRIL, 1953, at 3 p.m.

Speaker: Dr. G. W. Gale,
Dean of the Faculty of Medicine University of Natal.

R.S.V.P. to Hon. Secretary
(Mrs. J. M. Hyslop),
College House,
University of the Witwatersrand.

10 APR 1953 TEA.

Alexandra Health Centre and University Clinic.

5

BOARD OF MANAGEMENT, 1952.

Mr. Justice O. D. SCHREINER, Chairman.

Mrs. J. M. HYSLOP, Hon. Secretary.

Miss E. J. S. MOODIE, Hon. Treasurer.

Mrs. J. P. IMMELMAN, Asst. Hon. Treasurer.

Mrs. W. ARONSOHN.

Dr. JAMES BLACK.

Professor E. M. BURCHELL.

Professor G. A. ELLIOTT.

Mr. J. D. GAMEDE.

Dr. J. H. GEAR.

Professor O. S. HEYNS.

Professor J. M. HYSLOP.

Dr. M. D. W. JEFFREYS.

Advocate FELIX LANDAU.

Mrs. F. LANDAU.

Rev. JOHN LEPKE.

Mr. S. T. MOLEFI.

Mr. T. D. NEL.

Mrs. H. R. RAIKES.

Mr. Justice W. H. RAMSBOTTOM.

Mrs. B. J. F. SCHONLAND.

Mr. H. deC. STEVENS-GUILLE.

Professor W. E. UNDERWOOD.

Dr. L. S. WILLIAMS.

Professor B. J. S. WIMBLE.

S.M.C. Representative: Miss P. HARRISON.

S.R.C. Representative: Miss J. KROHN.

(For STAFF LIST, see page 3 of cover.)

ALEXANDRA HEALTH CENTRE AND UNIVERSITY CLINIC.

§

ANNUAL REPORT.

REPORT OF THE BOARD OF MANAGEMENT FOR THE YEAR ENDED 31st DECEMBER, 1952.

No year since the founding of the Clinic has, I believe, seen a greater increase in the amount of work done by its staff than has the year 1952. Whatever concurrence of factors has led to this result, expansion in several directions has become necessary if the Clinic is not to fall behind in the battle against disease at Alexandra. During the Clinic's early years it was obvious that with the meagre resources then available it could only scratch at the surface of the ill-health problems and that the services, though vital to the individuals affected, were, in relation to the total Township requirements, little more than token services, an earnest of developments to come. Gradually but perceptibly the position has changed. It is still true that we are far, indeed very far, from providing services that are sufficient according to present standards for the needs of the large Alexandra population. But, thanks to the growth in the South African community of a keener sense of urgency in health matters and of a livelier appreciation of the present-day possibilities of arresting and even eliminating some of the worst diseases, the actual position and the prospects at Alexandra have been profoundly changed, and the Clinic has to make adjustments to meet these changes.

To illustrate what has been happening I may refer to the T.B. and V.D. services which the Clinic resumed when the Government Health Centre dropped out in 1950. In the report for that year a note of caution was sounded as to whether we might not find the additional work too much for our capacity under the arrangements that were then made. As matters turned out, though the work was duly carried out, it became clear that further staff would have to be provided if, as modern science showed was possible, these fell diseases were to be reduced to relative impotence at Alexandra. Quite recently, thanks to the co-operation of the Union Health Department and the Alexandra Health Committee, steps have been taken which should intensify the campaign against these destructive enemies. In this connection the activity of the

Alexandra Anti-Tuberculosis Association, a branch of S.A.N.T.A., deserves the warmest commendation, and the progress of its new Settlement, with which the medical staff of the Clinic will be associated, will be watched with interest and hope.

With these growing responsibilities facing us it is gratifying to find that, thanks principally to increase in Union and Provincial Government support, in patients' fees and in the Students' Rag allocation, the year's work shows a substantial surplus. This will be absorbed in replacing losses incurred in previous years and in providing for the several forms of expansion to which I have alluded.

This is an appropriate point at which to make the mournful announcement that Miss E. J. S. Moodie, who has presided over our finances since 1940, has now found it necessary to pass the major part of the burden to other shoulders; she will continue to be a member of the Board and of our Finance Committee. It is impossible to express in adequate language, which will not seem exaggerated to those without knowledge of the facts, the enormous debt which the Clinic owes to Miss Moodie. On the one side should be considered the vast amount of patient, skilful, time-consuming labour she has spent in building up and maintaining a set of books that faithfully reflect the complex details of the Clinic's activities. On the other side regard must be had to the innumerable decisions, big and small, which she has constantly made on our behalf in the day-to-day running of the Clinic. Over the year she has carried uncomplainingly a great and increasing burden of responsibility, and it is no reflection on those who have in various aspects of the work rendered her loyal and efficient help to say that she has to a great extent managed the Clinic's business single-handed. That the Clinic has been able to weather the many storms of the past dozen years and carry out its widening functions has been largely due to the ability and unselfishness of Miss Moodie. We are most grateful to her for all that she has done in the past for the people of Alexandra, and are very glad to know that in the future the Clinic will still be able to rely upon her advice and assistance.

Certain developments in regard to the Clinic buildings must be mentioned. In the middle of the year arrangements were made for the erection of a doctor's residence on the North-western corner of our site. Finance for this development was provided to the extent of £4,000 by the Governor-General's Fund; we are most grateful to those on whose decision depended the making of this grant to the Clinic. Since the close of the year the house has been completed and provides a very important addition to our buildings.

The negotiations for a small emergency ward which were referred to in last year's report were continued but have not yet been completed.

To their many important benefactions to the Clinic Mr. and Mrs. W. Aronsohn have now, at the close of the year, added a

gift of £1,000 to start a special fund for the erection of the hall which we have always wanted. It was part of our original plan ten years ago and when erected will be used of an evening for health lectures and films; during the day it will serve as a waiting room for patients. We are hopeful that the lead given by Mr. and Mrs. Aronsohn will result before long in a fund being brought into existence sufficient to enable the hall to be erected.

Bequests totalling £365 from the estates of the late A. B. Rosettenstein, L. Edelstein and I. Liknaitzky are gratefully acknowledged and we are again beholden to Mrs. C. B. Anderson whose Morning Market realised the remarkable (record) figure of £450. Mention should also be made of the generosity of the proprietor of the Marlboro Garage, whose donation of a week's profits to the blind of the Township was distributed by the Clinic. Our thanks are extended also to the many donors of gifts in cash or kind whose names appear elsewhere in this report.

The Coronation Dental Infirmary has continued its fine work in the rooms named after the late Dr. Gottlich. The growing popularity and importance of this work is shown by the fact that an additional nurse-attendant is now required.

Our zealous and efficient medical, nursing, clerical and general staff are to be congratulated on a very heavy and successful year's work which has relieved many thousands of patients of disability and suffering.

Our thanks are once more due to Messrs. Vaughan, Key & Payne, who have again done our heavy audit without charge.

Our relations with "Entokozweni," the body which took over our Family Welfare Department in 1951, continue to be cordial.

In 1952, more even than in other years, the functions of chairman were carried out by Mr. Justice Ramsbottom with his customary self-effacing efficiency. While your regular chairman was in America he was able to see Mrs. Bridgman and Dr. and Mrs. J. Dexter Taylor, whose interest in the Clinic's work is as strong as ever. Although it was unfortunately not possible to visit Miss Cowles in California, the renewal of association with our very good friends of the American Board of Missions in the Boston area was delightful and inspiring. We were very glad to see Miss Emerson again and to enjoy the generous hospitality of Dr. and Mrs. John Reuling.

As will be seen from a comparison of the list of our Board members on the cover of this Report with the list for 1951 some of our fellow-workers have found it necessary to retire in favour of others. Since the end of the year Mr. and Mrs. Felix Landau and Professor Wimble have also left us. To those who have left us we are grateful for their past help and we welcome the newcomers who have taken their places

O. D. SCHREINER, Chairman.

MEDICAL SUPERINTENDENT'S ANNUAL REPORT—1952.

On reviewing annual reports of previous years it appears that each year saturation point seems to have been reached, only for the following year to see improvements in all spheres and expansions which were sorely needed. This is particularly true of 1952 which has demonstrated the resilience of the clinic, in spite of increasing numbers of patients and ever-expanding horizons of work.

Development during the year has been most clearly demonstrated in the maternal and child welfare services, the number of attendances having reached alarming proportions in 1952. The people of Alexandra owe a debt of gratitude to Sister M. Matthew for her capable handling of these services and the interest which she has taken in every family under her care.

Greater emphasis has been laid on the preventive and public health aspects of our work, particularly at our Antenatal and Baby clinic sessions, during which group and individual guidance in health matters is carried out by doctors, sisters and nursing staff. Immunisation of all babies attending Baby clinic has become a long overdue routine. It is rare to see such preventable diseases as congenital syphilis, rickets, whooping cough and diphtheria amongst these babies under our continuous care. It is hoped to introduce routine film shows, lectures, lantern slides, etc., as the few shows which we have held have been greatly appreciated by the patients.

In this connection a hall at the clinic would afford invaluable aid in our health education programme, and a fund has been created towards this objective.

Tuberculosis continues to take a heavy toll of life in the Township, but it may be stated with confidence that a start has at last been made towards the control and treatment of this dread disease. The Anti-tuberculosis Association of Alexandra must be congratulated on its truly magnificent work during the year under review, which has enabled two major projects to reach completion, i.e. the Soup Kitchen for the tuberculosis patients and their families (Thusong), and the Meintjies T.B. Settlement. Through the undivided interest and unremitting toil of the members of this Association, we can look forward to greatly improved tuberculosis care in Alexandra Township in the near future.

Dr. S. Fleischman and, later, Dr. D. Lurie and Dr. D. Fuller have contributed their time and energy voluntarily towards establishing an efficient treatment centre for tuberculosis at the Alexandra Clinic. We have now many patients, previously condemned to an early death as incurable, because of lack of hospital facilities, who have regained their health and strength through expert treatment in their homes. Together with the expansion of our domiciliary tuberculosis practice and the improvement in treatment, has gone the development of the Meintjies T.B. Settlement, which

in 1953 will rehabilitate many of the patients whose disease has been controlled; the settlement will provide, in addition, a unit for the treatment of early cases while awaiting hospital admission. The problem of the isolation of the incurable patient still remains a stumbling block, but propaganda and supervision in the homes ought to reduce the seriousness of contact with open cases to a bare minimum.

A mass miniature radiography survey was conducted in Alexandra Township during the year by the Department of Health—14,000 people, mainly schoolchildren and a few adults were X-rayed and mantoux-tested. It was demonstrated that, as was expected, the incidence of tuberculosis in this sample of the school population was low (the age-group 5—15 years is not usually heavily infected with tuberculosis) and not greater than in other areas of the country. The follow-up of this pilot survey is still under way. It is hoped that the mass radiography unit will return to Alexandra to X-ray each man, woman and child in the Township (80,000) to establish the true magnitude of the problem and to form a basis upon which adequate public health measures may reasonably be introduced.

Tuberculosis has been of fundamental importance in our work this year, and Health week was devoted to "Fight T.B." propaganda. Lectures were given by Medical Students, Doctors and Health Inspectors, and some members of the Executive Committee of the Anti-tuberculosis Association, in churches and schools throughout the Township. A Baby show was held at the clinic at which the then Deputy Mayoress of Johannesburg, Mrs. H. Miller, officiated. This was a great success and 180 mothers and babies attended, and each received a prize or a token.

During the year the Child Welfare Society has established a branch in Alexandra which is of great assistance to us in obtaining maintenance grants for deserving families. The Jan Hofmeyr School of Social Work has kindly given us the use of a final year social science student in order to deal with the routine problems which confront us in cases other than children. Mrs. B. Schtein has supervised this worker in a voluntary capacity. In this way more public assistance can be obtained for the needy.

The above forms an outline of the major developments during 1952. In February, a new team of Doctors was appointed at the Clinic. Dr. M. W. Susser was appointed Assistant Medical Officer, and Drs. Z. A. Stein and M. K. S. Hathorn were appointed part-time medical officers; I undertook the post of Medical Superintendent on the same date. An interesting facet of the new appointments is that they comprise two families, each containing two doctors, so that of necessity close co-operation is achieved!

I should like to express my sincere thanks to all members of the staff, both European and Non-European, both medical and lay, whose enthusiasm and interest have facilitated our work, and made the burden of numbers bearable. In spite of heavy pressure, the standard of work in all spheres was maintained at a high level.

I wish to extend the appreciation of my staff to Dr. E. Binion (Dermatologist) and Dr. B. Nesor and Dr. S. Shippel (Obstetricians) who gave service during a difficult year. To Mrs. Landau, Mrs. Harrison, Mrs. Crawford, Mrs. French, Mrs. Kruger and many others who assisted us in a voluntary capacity our grateful thanks are due.

I should particularly like to take this opportunity of paying a tribute to several medical supply firms, in particular Glaxo Laboratories S.A. (Pty.), Ltd., and Scherag (Pty.) Ltd., whose generous donations of drugs and supplies have made treatment possible in many cases during the year.

Special tribute should be paid to the members of the Alexandra Health Committee, who have co-operated well in all spheres relating to public health in Alexandra and whose interest and assistance have enabled us to achieve the advances in T.B. and V.D. work which took place during the year under review.

In conclusion, may I thank most sincerely the members of the Board of Management of the Clinic, whose sympathetic attention to all requests and wholehearted support, have made my task as Superintendent an enjoyable and satisfying one. Through their farsightedness, they have enabled the expansions mentioned to take place, and I feel content that each year brings us nearer our ultimate goal—that of providing an adequate medical service, both curative and preventive, for Alexandra Township.

SUMMARY OF ACTIVITIES.

A. CONSULTATIONS, DRESSINGS AND TREATMENTS:

1. Consultations:

	1951.		1952.
First Attendances ...	12,180	...	11,022
Repeat Attendances ...	23,400	...	25,708
	35,580	...	36,730

2. Dressings and Treatments:

	1951.		1952.
First Attendances ...	9,588	...	10,570
Repeat Attendances ...	22,656	...	22,500
School Dressing Station .	2,928	...	2,333
	35,172	...	35,403

3. Dermatology Clinic:

	1951.		1952.
Attendances	324	...	191

As may be seen, the numbers of attendances at our Out-patients and Casualty departments have maintained a constant level over the past two years.

B. DOMICILIARY CONSULTATIONS AND NURSING:

1. The number of home-visits is set out in the following table:—

	1951		1952	No. of cases
Nurses ...	12,804	...	15,125	nursed on District 1952 2,872
Sisters ...	396	...	379	
Students ...	1,908	...	729	
Doctors ...	1,776	...	2,943	
	<hr/> 16,884	...	<hr/> 19,176	

The home-visiting service has been severely strained during the year, due partly to lack of hospital beds and partly to various epidemics, such as whooping-cough and measles and summer diarrhoea which reached fairly large proportions this year. It must be mentioned that there are no isolation facilities for infectious diseases from this area, and Waterval Hospital is only able to admit our most serious cases. Through this lack, and through overcrowding, epidemics remain a scourge in the Township.

Our single major problem remains the lack of Hospital beds and in spite of co-operation from the various Hospitals, particularly Edenvale, which is our closest Hospital, many patients are treated in their homes because of lack of Hospital facilities.

Chronic Sick Home Visits:

1951—Total (including T.B.'s)	3,180
1952—General Cases	1,701
T.B.'s	865
		<hr/> 2,566

This service continues to render valuable assistance to many chronic sufferers in the Township.

C. MATERNAL AND CHILD WELFARE SERVICE:

1. Antenatal Clinic:

	1951.	1952.
First Attendances ...	1,812	2,517
Repeat Attendances ...	6,552	9,390
	<hr/> 8,364	<hr/> 11,907

It may be seen that the attendances at this clinic have gone up by approximately one-third. It has become necessary to introduce a repeat visit session conducted by the Nursing staff, as well as the twice weekly antenatal clinics conducted by doctors, in order to manage the greatly increased numbers of patients. It appears that the vast majority of expectant mothers in Alexandra utilise this service. It is interesting to compare the above figures with the figures for 1944 when the Clinic first started in its new buildings:—

472 New Attendances
1,632 Old Attendances
<hr/> 2,104 Total

Over the period of about 10 years there has therefore been a five-fold increase in these services which have always been the corner stone of the work at the Alexandra Clinic.

2. Maternity Cases:

Confined by—	1951	1952
Sisters and Midwives ...	1,212	1,861
Students assisted by Midwives	600	323
Hospitalised during labour ...	132	158
	<u>1,944</u>	<u>2,342</u>

The totals above reflect the increase in attendances at our antenatal sessions. It is interesting to note that just under 200 patients per month are delivered in our midwifery district. However, the staff is very limited for the conduct of this service, and the transport facilities inadequate, so many babies are "born before arrival." In spite of this difficulty our results compare favourably with other domiciliary midwifery services conducted in other areas of South Africa and also overseas; in fact our still-birth rate for 1952 was only 1%, which is a remarkably low figure.

3. Postnatal Visits:

	1951.	1952.
Sisters	1,176	535
Nurses	18,132	23,319
	<u>19,308</u>	<u>23,854</u>

Here again a heavy burden rests upon an inadequate nursing staff.

4. Postnatal Clinic Figures:

	1952.
Attendances	661

This is a new service and is becoming increasingly popular as the patients realise the benefit of a routine postnatal check-up.

5. Infant Welfare Clinic:

	1951.	1952.
First Attendances	888	1,544
Repeat Attendances	3,444	5,433
Pediatrics	2,028	3,717
	<u>6,360</u>	<u>10,694</u>

This reflects a pleasing increase in regular attendances. Only 1,544 out of a possible 2,342 babies have attended the Baby Clinic during the year, but this is a good proportion; the mothers as a whole are making ever-increasing use of this service, in which they obtain advice, guidance and medical care.

Throughout the conduct of the maternity and child welfare services emphasis is placed upon education of the patients in the care of themselves and their children. It is hoped that a routine ante-natal visit to homes will be conducted in 1953, in order to prepare the mother for her delivery and to educate her further on how to care for the family. This personal contact will form a sound foundation for further health education and propaganda on a group level.

D. TUBERCULOSIS AND VENEREAL DISEASES SERVICES:

1. T.B. Clinic:

	1951.		1952.
Cases: 1st Attendances ...	276	...	246
Repeat Attendances	348	...	905
	<hr/>		<hr/>
	624	...	1,151
	<hr/>		<hr/>

There has been a tremendous increase in repeat attendances due to the conduct of a treatment clinic on Thursday mornings at which X-rays are reviewed and patients receive special treatment such as pneumoperitoneum, refills, etc. I should like to express my thanks to the Alexandra Health Committee for their assistance in transporting patients backwards and forwards from their homes, which has enabled us to maintain the fundamental of T.B. treatment—Bed Rest—as strictly as possible.

	1951.		1952.
Contacts: 1st Attendances ...	660	...	740
Repeat Attendances ...	156	...	119
	<hr/>		<hr/>
	816	...	859
	<hr/>		<hr/>

The opportunity is taken to explain the disease at this clinic to the relatives, its infectivity and prognosis, and in this way co-operation is obtained in preventing its further spread within the home or outside.

2. V.D. Clinic:

	1951.		1952.
First Attendances ...	1,140	...	1,773
Repeat Attendances ...	9,204	...	12,865
	<hr/>		<hr/>
	10,344	...	14,638
	<hr/>		<hr/>

As may be seen there has been a marked increase in attendance at this clinic during 1952. The incidence of V.D. amongst our antenatal cases (on whom a routine blood test is performed) is 25%, so it may be seen that this disease is not yet under control in spite of newer methods of treatment.

The major difficulty in regard to T.B. and V.D. work has been insufficient personnel allocated by the Department of Health to conduct these ever-expanding services. However, negotiations are under way and it is anticipated that early in 1953 increased staff will be made available to us for the efficient conduct of these services.

It may be mentioned that during 1952 a regular course of lectures has been instituted for our nursing staff to enable them to educate patients in their homes and at the clinic in the elements of health and hygiene.

E. Immunisation of Contacts:

	1951.	1952.
Diphtheria	132	109
Enteric	216	72

Immunisation of Baby Clinic Cases:

Diphtheria	—	795
Vaccinations	—	225

In my report for 1951 I concluded by posing the question of how we were to achieve a transition from a predominantly curative practice to one which embodies the essential tenets of preventive medicine. I feel confident that the year 1952 has seen us make a start in this direction.

M. A. CORMACK,
Medical Superintendent.

§

REPORT ON DENTAL SERVICES

rendered at Alexandra Health Centre and University Clinic by
the Johannesburg Coronation Dental Infirmary,
January, 1952 — December, 1952.

1. Preamble:

The period under review completes the third year of dental services by the Johannesburg Coronation Dental Infirmary.

From February to August, due to staff reorganisation and shortage of personnel, we were reluctantly compelled to reduce the sessions per week from 10 to 8 to fall into line with all our associated clinics.

From August, however, when the personnel position improved, the Alexandra Dental Clinic reverted to 10 sessions per week.

At that time Dr. Laxton was replaced by Dr. Tren, a senior member of the profession, who had served many years on the staff of the Medical Officer of Health, Johannesburg, as dental surgeon to the non-Europeans in the Municipal locations.

II. Nursing Staff:

During the three years, at periodic intervals, when the trained dental nurse at Alexandra Dental Clinic was ill, there was some difficulty in replacing her with someone who had efficiently understood the dental aspect. It speaks for itself that under such conditions the efficiency and quality of work performed by the dental surgeon must suffer. For this reason we approached the authority concerned (Chairman of the Health Centre) and suggested a second nurse for some of the services, so that two nurses could be acquainted with the routine work of the dental surgery and organisation. The authority concerned was most sympathetic and co-operative, and we have no doubt that some suitable arrangement will be made in the near future.

GROUPS AND SERVICES.

III. Pre-School Group:

This group attending nursery schools is classified as a priority one, and its members receive a comprehensive service with emphasis on the conservative (filling) aspect. (See Table II.)

There are many snags encountered in this group—the question of regular attendance and mode of transport—when weather is good and warm the children walk but when wet and/or cold, they just do not turn up, often not even at the Nursery School.

The other drawback is the “follow-up” system, whether it be at four months, six months or longer period intervals—some go from nursery school to ordinary school—some cannot get into any school, with the result that they cannot be traced.

In one school, the Holy Cross Mission, this latter difficulty is almost non-existent, because the nursery school is part and parcel of the ordinary school and within the same grounds, thus the “follow-up” scheme is possible and workable.

IV. School, Juvenile and Adult Group:

This group includes the ante- and post-natal mothers of the community. The service rendered to these groups is a casualty service, only catering for the elimination of sepsis and the relief of pain. If it is borne in mind that the population of Alexandra is approximately 80,000 with a school population of approximately 16,000 and we are trying to render a dental service with one full-time dental surgeon and one nurse, it must be appreciated that we are not even scratching the surface.

STATISTICS

An analysis of the services provided for the pre-school child (Table II) reveals that there were no less than 2,300 attendances. The excess of fillings over extractions is most gratifying. The 1952 figures are somewhat lower than those of the previous year (1951) due to the reduction of sessions which was explained in the preamble.

Table I.—Casuals (Adults, Ante- and Post-natal Scholars).

	Attend- ances.	Examina- tions.	Extrac- tions.	Fillings	Treat- ments.	Total Opera- tions.
Jan.—Dec. '52	4434	4329	5916	—	23	10268
Jan.—Dec. '51	3153	3189	4276	13	111	7589

Table II.—Pre-School.

	Attend- ances.	Examina- tions.	Extrac- tions.	Fillings	Treat- ments.	Total Opera- tions.
Jan.—Dec. '52	2322	1096	161	1613	221	3091
Jan.—Dec. '51	2442	1001	289	2085	467	3842

V. Casualty Service:

The casualty service has grown considerably as is reflected in the increased figures for the year under review. Patients, according to our records, are attracted to this dental clinic from as far north as Halfway House and south from Moroka and Orlando Townships also from Pretoria district, Kempton Park and Edenvale area.

The inhabitants of Alexandra take full advantage of this casualty service. The constant requests for artificial dentures, which at present we are not able to satisfy, must very soon be seriously discussed with the contributing authorities of the parent organisation.

VI. Conclusions:

We modestly state that within its present limits the dental service is operating most satisfactorily. It is most obvious that one dental surgeon with one nurse for a population of between 80,000 and 100,000 is totally inadequate and the sincere hope is expressed that some attempt be made by the authorities to improve this long overdue position.

VII. Acknowledgments:

We wish to record our very sincere appreciation to the Medical Superintendent, Dr. M. Cormack, to the Nursing Superintendent, and to all the Staff for their willing co-operation and assistance during 1952.

G. A. FRASER, D.M.D. (Harv.),

Director.

ACKNOWLEDGMENTS.

Throughout the year we have had the support and assistance of many friends, and we wish to take this opportunity of making known our sincere gratitude and appreciation of gifts and service.

Gifts:

Fully equipped Doctor's Bag and fully equipped Midwifery Bag from the Holy Rosary Convent, Killieshandron, Ireland.

Two cases Incumbe each month throughout the year from Hind Bros. & Co.

Cot, Mattress and Baby Clothes from Mrs. Smith, Highlands North.

Variety of Baby Foods from S.A. Druggists.

Baby Foods from Protea Pharmaceuticals Ltd., per Mr. A. Christos.

Baby Foods from Nestle (S.A.) Ltd.

Baby Clothes and Babies' Feeding Bottles from Mrs. Tickton, Dunkeld.

Packing Cases from Mr. Groom, Empisal Textile Machinery Corpn.

Paper Bags from Ysebrand & Co.

Sweets from Chapelat, Ltd.

Medical Supplies from the following:

Messrs. Glaxo Ltd.

Messrs. Mendley and James Ltd.

Messrs. B. Owen Jones Ltd. (per Mr. R. Hunter).

Keating's Pharmacy.

Scherag (Pty.) Ltd.

Fruit and vegetables from the Rector, Holy Trinity Church, Bramley.

Bottles and newspapers from many old friends who collect them and deliver them to the Clinic—these are most useful.

The Public Utility Transport Corporation, Ltd., have again assisted us on many occasions during the year with the transport of materials of various kinds to the Clinic. They have also provided free tickets for patients requiring transport to Hospital.

Mrs. Aronsohn has, as always, been kind in many ways. With the help of her sisters, Mrs. Goodman and Mrs. Lazarus, she once again organised the tea arrangements for the Annual General Meeting.

The members of the Martha Washington Club never fail in their kindness to the Clinic, and assist us in many ways, always with the same cheerfulness.

Mrs. Harrison and Mrs. French have given invaluable assistance in the Baby Clinic.

Thanks for discount of 10% are due to the Northern Paint and Hardware Company.

Mr. Lessem of Lessem's Ltd. is also due thanks for the generous terms given when goods are purchased for the Clinic.

Large parcels of mending are taken to Mrs. J. R. Anderson at regular intervals, and are always cheerfully received, for which service we are most grateful.

Christmas Parties.

Each year there is a feeling of anxiety as to whether these parties can be financed, but once again, thanks to the generosity of friends of the Clinic, they were arranged and proved to be a source of happiness to mothers and babies alike.

Donations and assistance were forthcoming from the following:
Donations:—

Miss Ruth Cowles	£8 17 4
Reckitt and Colman	5 0 0
Miss Drabble	2 2 0
P.T.P. School	10 0
Dr. J. Gilroy	1 0 0
Sister Philippine	5 0 0
Mrs. Crawford	10 0 0
Native Commissioner	12 0 0
Rand Daily Mail	10 0 0

Gifts:—

P.T.P. School (Mr. and Mrs. T. E. Lawlor): Toys and clothing.

Mrs. D. Isaacs and Mrs. Patley: Tin of sweets.

Mrs. H. Logie (University Goodwill Club): Christmas tree.

Mrs. Dicks: 150 lbs. of sweets.

Miss Harding: Sweets.

Mrs. Aronschn: Sweets.

Gallagher's Bakery: Buns for Blind and Nurses' Christmas cake.

Messrs. Gundelfingers: 72 tins of jam.

Messrs. Lever Bros.: 1 case of soap.

Cheeseborough Mfg. Co.: 5 gross jars Vaseline.

American Sewing Group: Bags, pinafores, dungarees.

Coca Cola (Mr. Charles Brady): Reduction in price.

Maryvale Mineral Water Works: Reduction in price.

Mr. Willie Wong: Turkey.

Assistance:—

Dressing of Dolls: Parktown High School for Girls (Miss V. Worthington); Forest High School (Mr. Bovet); 24th Johannesburg Company of Girl Guides.

Entertaining the Blind: Mr. W. Cohen.

Arranging for Ezenzeleni Choir: Mr. W. E. Vanham.

The special committee of ladies who come forward to work for these parties each year, and who do so much to ensure their success, spent a very busy time at the Clinic, and once more earned our gratitude and admiration.

The American Women's Sewing Group made a splendid contribution to the success of the parties in making a large number of garments for the children, who were obviously delighted with the gay and attractive pinafores and dungarees which they received. Mrs. J. R. Anderson also helped with this work.

At the party for the blind the guests were entertained by the Choir from Ezenzeleni who were brought by Mr. Vanham, and our thanks are due to them for their kindness in once again coming to this party and contributing to its enjoyment. Mr. Walter Cohen also came along, and his presence was much appreciated.

The Christmas parties at the Clinic would not be the happy affairs which they are if it were not for the tremendous amount of work done by the Sisters and Nursing Staff, assisted by the Domestic Staff. Each year they devote time and thought to the planning of the parties, and their efforts are greatly appreciated by all.

To all other friends who assisted us with the organisation of the parties we take this opportunity of acknowledging our thanks, and to any whose names may have been omitted we tender sincere apologies.

(Sgd.) O. D. SCHREINER, Chairman.
E. J. S. MOODIE, Hon. Treasurer.

To the Members,

Alexandra Health Centre and University Clinic.

We have examined the books and accounts and vouchers of the Clinic and have satisfied ourselves of the existence of the securities. We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit. In our opinion proper books of account have been kept by the Clinic, so far as appears from our examination of those books.

The above Balance Sheet and the Income and Expenditure Account are in agreement with the books of accounts and, in our opinion, and to the best of our information and according to the explanations given to us, the Balance Sheet gives a true and fair view of the state of the Clinic's affairs as at 31st December 1952, and the Income and Expenditure Account gives a true and fair view of the income for the year ended on that date.
